Application No. : **2,456,268**
Owner : TORRANCE, EDWARD
Title : **CABLE ORGANIZER CABINET**
Classification : A47B-81/00
Your File No. : **7317-001C**
Examiner : Jean-François Dufour Jr. Eng.

YOU ARE HEREBY NOTIFIED OF :

- A REQUISITION BY THE EXAMINER IN ACCORDANCE WITH SUBSECTION 30(2) OF THE *PATENT RULES*;
- A REQUISITION BY THE EXAMINER IN ACCORDANCE WITH SECTION 29 OF THE *PATENT RULES*.

IN ORDER TO AVOID **MULTIPLE ABANDONMENTS** UNDER PARAGRAPH 73(1)(A) OF THE *PATENT ACT*, A WRITTEN REPLY TO EACH REQUISITION MUST BE RECEIVED WITHIN **6** MONTHS AFTER THE ABOVE DATE.

This application has been examined as originally filed.

The number of claims in this application is 15.

A search of the prior art has revealed the following:

References Applied:

United States Patents

6,017,228	January 25, 2000	Int. Cl. ⁷ H01R 13/44	Verbeek et al.
5,686,700	November 11, 1997	Int. Cl. ⁶ H02G 3/18	Carpinella

Verbeek et al. disclose a cabinet comprising a base, a rear panel, a top panel, oppositely arranged side panels, a front panel and power supply means located inside the cabinet; the front panel comprising a door; the top panel comprising a planar surface having an opening; the door comprising one panel hinged on one side; the power supply means comprising two ports to receive male end plugs.

Carpinella discloses an adjustable cable management grommet for routing cables through an opening on a surface.

The examiner has identified the following defects in the application:

Claims 1, 2, 4 to 11 and 13 to 15 do not comply with Section 28.3 of the *Patent Act*. The subject matter of these claims would have been obvious on the claim date to a person skilled in the art or science to which they pertain having regard to Verbeek et al. in view of Carpinella or common knowledge. Regarding claims 1 and 10, it would have been obvious for a person skilled in the art of cabinets to further provide openings on the side panels or to attach the cabinet to a desk since no new, useful and unexpected mode of operation or function results. Regarding claims 5 and 14, it is obvious to merely change the form or proportion of a machine or manufacture, unless a new unexpected mode of operation or function results. Regarding claims 7 and 8, it is obvious to substitute the material of which a machine or manufacture is made unless a new, useful and unexpected use results. Regarding claim 9, no new structures or new way of cooperation between new structures or known structures, producing new and unexpected results, is disclosed. It is held that a person skilled in the art of cabinets adapted to organize electrical cables would have thought of combining the structures of the cabinet disclosed by Verbeek et al. with the structures of the adjustable cable management grommet disclosed by Carpinella or the herein mentioned obvious improvements and to make them cooperate together to form a cabinet adapted to organize electrical cables as defined in claims 1, 2, 4 to 11 and 13 to 15, on the claim date. Therefore, the subject matter of claims 1, 2, 4 to 11 and 13 to 15 is considered obvious having regard to Verbeek et al. in view of Carpinella or common knowledge.

Claims 3 and 12 do not comply with Section 84 of the Patent Rules because the claimed characteristic "adapted to slide parallel to said front panel when placed in an open or closed position", is not described in the description.

This application does not comply with Subsection 27(4) of the Patent Act. In claims 1 and 10, the inclusion of "adapted such that" causes lack of clarity. In claims 1, 3, 6, 7, 10, 12 and 15, the use of the expressions "adapted to", "arranged to" or "similar to" brings indefiniteness as it attempts to give both broad and narrow meaning to the scope of the claims.

Under Subsection 81(3) of the Patent Rules, applicant must fully identify the document referred to on page 1, lines 16 and 21, page 2, lines 4, 10 and 16 and page 3, lines 1 and 6. A document so referred to should be identified at least by country, number and date for a published patent document, or by title, author, date, and source for non-patent documents.

Regarding description page 1, line 21, Canadian Patent 430,039 is not entitled "Cable Manager" but "Tiltable Dynamometer". Canadian Patent 1,206,578 is entitled "Cable Manager". Regarding description page 2, line 10, Canadian Patent 485,971 does not disclose a cabinet for electronic apparatus. Canadian Patent 485,971 disclose a pulse producing apparatus. The description should be amended.

In view of the foregoing defects, the applicant is requisitioned, under Subsection 30(2) of the Patent Rules, to amend the application in order to comply with the Patent Act and the Patent Rules or to provide arguments as to why the application does comply.

Under Section 29 of the *Patent Rules*, applicant is requisitioned to provide an identification of any prior art cited in respect of any application(s) describing the same invention on behalf of the applicant, or on behalf of any other person claiming under an inventor named in the present application, and the patent number, if granted. Amendment to avoid references cited abroad may expedite the prosecution. In accordance with Subsection 29(3) of the *Patent Rules*, if the particulars are not available to the applicant, the reason why must be stated.
